I'm Aditya Sharma, a Software Engineer and an alumnus of IIT Tirupati, with a CGPA of 8.8
Full Stack Compliance Engineer at ServiceNow, automating controls to achieve 100% compliance and saved over 1000+ Man Hours for control owners.

Experience

Software Engineer 2 - ServiceNow July 2023 – Present

- Leading enterprise control automation initiatives across Access, Change, and Incident Management domains.
- Built a **Prompt-to-Dashboard Builder** converting natural language inputs into dynamic ServiceNow dashboards.
- Architected backend interpretation logic mapping prompts to tables, metrics, and widgets.
- Improved compliance visibility and reduced dashboard creation effort across audit teams.
- Automated **30+ enterprise controls**, eliminating manual compliance workflows.
- Delivered automation saving **1000+ hours annually** for Control Owners and SOX teams.
- Designed scalable validation frameworks improving audit reliability and operational risk control.

Software Engineering Intern - ServiceNow May 2022 – July 2022

- Automated integration testing workflows on Boomi platform.
- Built detection systems for authentication failures, server errors, and payload validation.
- Implemented parallel asynchronous execution with automated reporting.

Projects

Code Vision - VS Code Extension 2022

- Built accessibility extension enabling blind programmers to navigate and interpret code structure.
- Parsed Python constructs into structured auditory representations.
- Implemented syntax error detection and structural summarization.

Technologies and Languages

Technologies and Frameworks: ServiceNow, Node.js, Express.js, SQL, MongoDB, React.js, Git

Languages: JavaScript, C++, Java, Python, C

Core Areas: Access Controls, Change Management, Dashboard Engineering, Automation Frameworks, AI Workflows

Education

• **Indian Institute of Technology Tirupati**, B.Tech in Computer Science – 8.74/10 2019 – 2023
